

## MemberConnect 4.5.7 Release Notes:

On July 13, 2007, MemberConnect released and implemented four fixes:

- ❑ Links on Sermon List page now work even if there is no file associated with it. Previously, when creating a sermon and not attaching a file (only a description), the corresponding link would attempt to open an empty file at http://null. Now if there is no associated sermon file, users will be taken to the Sermon's information page.
- ❑ The gray separating lines between the events on the calendar were removed from the grid. They have been now been restored.
- ❑ After clicking the  Print icon and the "Send To Printer" text, the document actually printed the "Send To Printer" text on the document. Now the "Send To Printer" text no longer appears when printed.
- ❑ The code that handles embedding Slideshows and other scripts to the WYSIWYG has been modified to be more friendly towards those scripts.

If you have any questions or concerns about the latest fix release for MemberConnect (4.5.7), please feel free to contact Concordia Technology Solutions at 1-800-346-6120.
